Could you just remind people to get comments in by cob today or for special people saturday night. Thanks
Mike

I told Dan that we should take it out, too, but if they want to try to rewrite it, it is ok with me. Marie is going to ask some of her folks to review the responsiveness summ. I'll ask Rene to look at it again. Donald proofed it and found a few nit picky typos that I would have missed. I think we are still on track for Tuesday for the final, including posting (if we can swing it). We'll post public input, responsiveness summary, new report and data on Tuesday. The errata and revised report still needs to go through the ET. A week more should be plenty. I'd like to get it to the ET next Wed if possible, but I'm not sure how long it will take me to make the edits and update the pdf. The edits are so minor it is hard to believe that the ET will want to read the report again.

Have a great weekend. (b) (6)

Funny they are concerned with that. Not sure how it could be dumbed down. Might as well just take it out. Did you ask anyone else to review outside our group? Is dan okay with tuesday for comments? So that means comments, responses, new data and new report all go out next tuesday? I am sure the next push is to revise report. How about the tuesday after to get new report out. Mike

Everything totally went to shit. Just kidding. Peer review comment & response is with Glenn and Joyce told him we are posting responsiveness summary on Tuesday. Dennis is concerned about NRCS response #24, but I don't think we need to have a call with NRCS because Dennis and Dan are going to modify the response so they are more comfortable with it. We're meeting with Dan tomorrow morning. I am making the final pdf of the new report tonight. I need to call Charles Bert to prep him for next week. We're muddling along. Go have fun!
